wherein:  
the spacer is made porous by exposing the spacers to an oxygen plasma, as required by claim 11;  
...the spacer comprises organic material;  
the spacer is made porous by removing the organic material, as required by claim 12;  
...depositing a thin layer over the porous dielectric material;  
wherein:  
the pores are formed during the spacer etch, rather than during deposition of the dielectric material, as required by claim 14; and
